IT Specialist – RSCMED4005

Description

Position's primary focus are in the areas of computer operations, user and desktop support (hardware and software), helpdesk, and data management. Performs a variety of moderately complex information technology support duties to ensure smooth delivery of technology services. Monitors, operates, or coordinates and assists others in the operation of computer hardware, software, and peripherals in order to achieve desired results. Utilizes computer equipment, software and diagnostic tools to perform a broad range of customer assistance, production job processing, equipment maintenance and repair and computer operations assignments. Requires minimum supervision and may act as lead when the need arises. Updates supervisor on status of projects or technical issues. Exercises judgment and creativity in selecting and applying procedures correctly, and determines when to refer problems to the supervisor or next level of support.

To ensure that computer networks are running smoothly and efficiently, the IT assistant performs an array of tasks.

Typical Duties

1. Provides assistance in the use of personal computer hardware, software, 2. Sets up and configures desktop computers, peripherals and accounts assigning security level; 3. Installs software and installs and repairs hardware and peripherals; 4. Tests programs; 5. Troubleshoots, diagnoses problems, implements corrective action procedures within prescribed guidelines and/or escalates to other technical resources as appropriate; 7. Administers user accounts; 8. Designs and produces basic reports; 10. Transfers computer files between platforms; 11. Provides basic troubleshooting, repair and maintenance for computer equipment (e.g. microcomputers, disk drives, and laser printers) and may assist with testing personal computers and peripherals on a network to diagnose, hardware versus software problems; 12. Acts as a user liaison for the computing operation, communicating, resolving, and/or initiating the resolution of problems and concerns; 14. Maintains records; 15. Contributes to unit goals by accomplishing related duties as required.

Installing and Configuring

In the event that their company purchases a new computer network, it will be up to the IT assistant to install and configure that new network so that employees can begin using it as quickly as possible. Additionally, new computer networks will have to be configured to suit the company's unique needs. Many peripherals have to be set up in order to complement the computer network. These can include things such as printers, keyboards, routers, modems, and smart devices. It is the IT assistant's

Employment Type
