Lead UI Developer-Full Time- RSCAUS4083

Description

Reliable Staffing Austin is now seeking a Lead UI Developer who can draw upon their experience and skills to help develop and maintain products using modern, open-source technologies and development tools, as well as leverage their experience and leadership skills to drive the technical execution of software projects. This role will allow you to blend management, development and creative skills to help build a world-class web development team. Our company wants technologists who crave the opportunity to make an impact on a product that truly helps the researchers, librarians and educators on a global basis.

What you will be doing: Developing a new UI while enhancing, monitoring and maintaining UI functionality in online SaaS products. Evaluate design and development proposals, identify and suggest viable options, estimate scope of work, create project documentation, implement designs, execute project deliverables and follow through with users. Identify, prioritize, and assign work to others to ensure the right solution is delivered at the right time- prior experience with task assignment. Be involved in creating and improving infrastructure to address system performance, security, maintainability, and scalability of the product. Manage a small group of UI developers, mentoring and guiding their professional development, and owning group processes and best practices.
