Product Manager-Full Time- RSCDL4073

Description

Reliable Staffing Dallas is now seeking a full time IT Product Manager. This position will report directly to the Director of Product Management and will play a key role in both the tactical and strategic execution of product roadmap activities. The Company provides identity based security solutions thus empowering enterprises, consumers, citizens and web sites. This approach offers strong authentication, fraud detection, digital certificates, SSL and PKI to the consumer. Position Requirements:

Bachelors degree or higher in software engineering or computer science.

5-7 years experience in Product Management, specializing in knowledge of product, placement, and promotion and pricing strategies. Ability to take product from inception to multi-million dollars of annual revenue. Knowledge of cyber security threats and information security products, services and concepts. Knowledge of the software authentication landscape. Excellent customer service, written and oral communication skills. Strong work ethic and ability to learn new technologies and concepts quickly. Experience with large system integrators and channels. Ability to travel up to 10%. Preferred qualifications:

MBA in software engineering or computer science. Experience with system-level software and operating systems. Understanding of other information security technologies, vulnerabilities and vendors. Knowledge of Companys products and architectures
