## Technician-Full Time-RSCMD4115

### **Description**

Reliable Staffing Midland is now seeking a Technician. The Technician for this position has a strong I&E focus: maintains and operates crude oil pipelines, pump stations and all of the associated equipment such as Scada communication equipment, pumps, motor operated valves, pressure switches, electric motors, transmitters, vibration switches, electronic controls and pressure regulators. The Pipeline Technician modifies, repairs, or overhauls electronic and electrical equipment and controls. Applies knowledge of electronics principles in determining equipment malfunctions, and applies skills in restoring equipment to operation. Responsibilities include, but are not limited to:

Participate in installing all instrumentation and electrical components safely. Troubleshoot problems with control systems and complex equipment associated with crude oil operations. Run conduit, pull wire, change motors and maintain lighting systems and basic motor controls. Maintain, modify and troubleshoot Distributive Control Systems (DCS) and/or Programmable Logic Controllers (PLC) to maximize use of control technology and minimize installation and operating costs. Maintain advanced monitoring devices (gas, flame, or fire detectors, vibration and temperature monitors). Maintain and operate custody transfer measurement

facilities and perform product quality control tests. Monitors crude oil receipt and delivery activities to appropriate pipelines or tankage. Locate pipelines as needed and oversee excavations and line crossings. Launch and receive cleaning pigs and assist with the launch and receiving of smart pigs. Install pipeline markers and do routine inspections on ROW. Maintain and operate corrosion control equipment. Attend and participate in damage prevention meetings. Interface with various landowners including private, state, federal, etc.

Previous experience and knowledge of industry related maintenance and repair standards preferred.

Journeyman electrical designation is highly preferred.

The ability to read at a level to understand written safety procedures, work procedures, blue prints, P&IDs, work permits, and technical instruction manuals is required.

Thorough knowledge of electrical codes and is familiarity with AC voltage (120-480) three phase and single phase plus 24 VDC is required.

**Job Location**

4500 W. Illinois Suite 203 M, 79703, Midland, Texas, United States
